

Our Mission Statement

The mission of Kids Unlimited School is to provide all students with a sound foundation in both educational and social skills, so that they may progress to Senior Levels as confident responsible young people, with a desire to learn, and the ability to make a useful contribution to society.

Our Slogan: *Creative learning in a loving environment.*

For more than 16 years, Kids Unlimited School has lived up to its original commitment to help your child's academic, mental, physical and emotional development in a learning environment that is pleasant and stress free.

How will Kids Unlimited School help your child learn?

The organization of Kids Unlimited School permits students to work on academic material that is both challenging and appropriate to their ability. A sense of community, a "safe place" is developed through meaningful activities thus creating an environment conducive to learning. Added to that is an after-school programme for our own students and those from other schools, which provides for supervised homework assistance, supervised free play and activities such as Karate, Brownies & Guides, Ballet, Soccer and music.

How do children develop both self-esteem and respect for others?

The children are encouraged to value and support each other, in class and at play. Children are taught to solve their own social problems with the assistance and supervision of the staff. Discipline is accomplished with firmness consistency and understanding.

Favourable teacher/student ratio allow teachers to take children and their ideas seriously. This promotes self-esteem, eagerness to share ideas, and co-operation in the learning process. Children are encouraged to think independently as well as work together to solve problems.

Dedicated to your child's development
